<b>Why would you recommend/not recommend this course?</b>					
need this type of therapy for NDs					
very important and useful for clinic and patient treatment					
very informative, tied up a lot of loose ends around heavy metals, vaccines and autism and detox in general					
great resources provided					
knowing how to properly and safely administer treatment is a great way to help people; especially children with autism					
in Canada, relevant info					
clear and concise course notes					
very comprehensive supplementary material; Dr Prytula great lecturer					
great personal anecdotes, statistics, history and applicable/resourceful charts					
<b>What would you change about this course?</b>					
make slides downloadable					
do it on a heli trip :)					
hear about actual cases - difficult and easy					
more time spent on specific protocols for certain conditions; more case studies					
addition of case examples from instructor's private practice					
charts need updating; very convoluted and difficult to read					
booklet --> 9 slides per page is too hard to read					
option to skype in, online tutorial/podcast					
practical exercises on choosing chelating agents and how to prepare them would be helpful					
include full citations for all research; full-page printouts of tables would make them easier to read					
case and treatment guidelines (eg. Initial visit, frequency of treatments, etc)					
<b>Would you like to take further courses given by Michael A. Prytula ND?</b>	Yes	Maybe	No
